

# **NexTec Group Now Offers Sage ERP X3**

## ***NexTec Group Expands Their Diverse ERP Product Portfolio with Sage ERP X3***

**Seattle, WA – January 4th, 2010** – NexTec Group, a leading provider for Sage and Microsoft accounting and ERP solutions, today announced that it has reached an agreement with Sage to sell and distribute their Sage ERP X3 enterprise software suite.

The [Sage ERP X3](#) solution addresses the needs of mid-to-large enterprise customers. Scaling up to more than 1,000 concurrent users, and with multinational capabilities, Sage ERP X3 is aimed at meeting the most elaborate business processes of manufacturers and distributors in a global market. In essence, Sage ERP X3 goes beyond the capabilities of both Sage MAS 500 and gives growing Sage BMD customers a continued migration path under the Sage brand.

A fully integrated ERP suite, Sage ERP X3 is functionally robust across manufacturing, distribution, warehouse management, customer relationship management and finance. The system supports the unique formula management, quality and regulatory requirements of process manufacturers and a variety of discrete and mixed-mode manufacturing environments as well as wholesale distributors. The first web-native ERP solution engineered for mid-sized companies, Sage ERP X3's SOA architecture and design offer tremendous savings and benefits, including reducing IT infrastructure costs and expanding business opportunities.

“Sage ERP X3 fills a niche between products with more limited feature sets and costly niche or Tier 1 solutions that are expensive to support and difficult to implement”, said Russell Harper, VP NexTec Group. “We look forward to bringing a globally recognized product to our marketplace.”
